

**Powerful and economical through maintenance-free 3-phase AC drive motor**

**Manoeuvrable and compact through very short front length**

**Extremely space-saving and safe with tiller in upright position through crawl speed button**

**Sensitive lifting and lowering from the tiller through adjustable speed range of hydraulic motor**

**Integrated charger for easy charging at any mains socket**

## EJC 110/112

### Electric pedestrian stacker (1000 and 1200 kg)

The pedestrian stackers of the EJC range 1 show their strength wherever transporting over short distances and stacking up to a lift height of 3600 mm take place. With a very short front length (L<sub>2</sub> dimension) of only 637 mm, the EJC is particularly effortless and safe to manoeuvre, even in confined spaces.

The high performance drive motor in 24 V 3-phase AC technology is an added bonus.

Its optimised efficiency factor ensures high speed and excellent acceleration in every situation – the best preconditions for fast, efficient goods throughput.

Another advantage: the lift control. This enables the operator to pick up loads accurately and sensitively. This makes particularly the depositing of large loads in narrow racking easier. The remarkably low noise development during slow lifting

also makes work for the operator easier. Proportional hydraulics ensure gentle depositing of the load on the floor or in the racking.

The required power is supplied to the EJC 110/112 via batteries with capacities up to 200 Ah. An integrated charger facilitates comfortable and reliable charging of the installed battery at any 230 V mains socket.

# EJC 110/112

This specification sheet according to VDI regulation 2198 only provides technical values for the standard truck. Non-standard tyres, different masts, additional equipment, etc. could produce other values. Right reserved for technical changes and improvements.

# Make use of the advantages

## Innovative 3-phase AC technology

Jungheinrich motors in 3-phase AC technology provide you with more performance efficiency and a reduction in operating costs at the same time. Make use of these advantages:

- High efficiency factor with excellent energy management.
- Powerful acceleration.
- Quick travel direction change without the usual "pause for thought".
- No carbon brushes – the drive motor is maintenance-free.
- Two-year warranty on drive motor.

The EJC cuts a fine figure even in narrow racking aisles

## Manoeuvrable and compact

Due to its very short front length of only 637 mm, the EJC can be operated even in the most confined spaces. If even this is not sufficient, work can carry on with the tiller in the upright position at crawl speed.

## Comfortable depositing and retrieval

All lifting and lowering functions are effortlessly controlled from the multi-

function tiller head. The operator can thus totally concentrate on depositing or retrieval. Other performance characteristics are included that make depositing and retrieval operations remarkably safe and economically efficient:

- Precise and gentle depositing of loads through Jungheinrich speed-controlled hydraulic motor.
- Low noise development during slow lifting through lift control.
- Gentle depositing of load through proportional hydraulics.
- Long safety tiller for adequate distance between operator and truck.

## Informed at any time

Extensive control instruments and adjustment possibilities facilitate control at a glance:

- Battery discharge indicator (3-colour light emitting diode) with lift stop.
- Information display "CanDis" (optional) with added operating hour display and fault code memory.
- Activation of truck via PIN and selection of 3 travel programs through "CanCode" (optional).
- Adjustable travel parameters through CanDis and CanCode (optional).

Access authorisation CanCode and CanDis (optional)

## Comfortable travel

The Jungheinrich impulse control "Speed-Control" facilitates comfortable, safe travel with adjustment possibilities to any application:

- The pre-set speed on the travel switch is maintained in every travel situation.
- The operator is able to choose between 3 different travel programs (optional).
- Regenerative braking on reducing the travel speed.
- Very low noise level during travel.

Integrated charger 30 A for comfortable battery charging at any mains socket

## Long operating times

- Energy-saving 3-phase AC technology – in combination with battery capacities up to 200 Ah (2 EPzB 130/150/200 Ah) – ensures long operating times.
- Integrated charger (24V/30A) for wet and maintenance-free batteries for easy charging at any mains socket.

## Additional equipment

- Cold store version.
- Battery discharge indicator/operating hour meter.
- Access authorisation via CanCode.
- Vertical load guard.
